

### ABSTRACT OF THE DISCLOSURE

There is provided a digital camera to which external programs can be installed for appending desired functions thereto. Print image data generating programs to be stored in a recording medium in the digital camera are transmitted from a personal computer, an external extended recording medium of the digital camera, or an external device via a modem and a communication line. In any cases, the stored programs are read out at desired time to execute an print image data generating processing which transmits the print image data to a printer for printing the image. The stored program can be deleted at a desired time.
